Technical Info EN

2020

The commitment to maximum sustainability and comfort shapes Funda, a new range of seats conceived by the outstanding designer Stefan Diez under the umbrella of creating an innovative and light chair.

This new collection is presented as a construction made up of two differentiated pieces that, thanks to its shape, simulate the gesture of two hands which embrace the user. The development of Funda has been based on combining a metal structure designed to last over time, and an upholstered seat that can be replaced after years of use or severe wear and tear.

## Stefan Diez

Stefan Diez introduction to furniture design started in 1991 when he started an apprenticeship as a cabinet maker. Diez went on to study at Staatliche Akademie der Bildenden Künste in Stuttgart in 1996 where he attained a Diploma in Industrial Design.

He founded his studio in 2003 and since then has worked in various fields of design ranging from furniture and tableware to industrial design, as well as exhibition design.

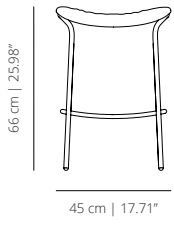

Some of his products have received international design awards, among others the "Designpreis der Bundesrepublik Deutschland", the "IF Gold award" and the "red dot best of the best award".

Diez works intensively with materials, technology and is passionate in his quest to fathom out their limitations. Together with his office they develop products that are precise, yet simple and above all are meant to meet human needs. His work results from an approach that uses both analogue and digital methods and accumulates experiences that are applied in development and production processes.
